

Bamboozzy

Manual and Tips for
Reusable Makeup Remover Pads

THANK YOU FOR JOINING!

Thank you for the purchase of the Bamboozy reusable makeup remover pads. Together we will strive for a better planet with less waste and plastics.

(Micro) plastics are becoming increasingly problematic as we already see it in the fish we eat. Besides that, plastic also takes more than 10 years to break down.

By becoming more aware about the things we throw away in our daily lives, we can do our small part individually to tax our planet less.

If you have any questions about the product or your Amazon order, please let me know by replying the email from Amazon. I'll do my best to help you in any way I can.

Thank you and I hope you enjoy the pads as much as I do!

YOUR REUSABLE MAKEUP REMOVER PADS

The reusable makeup remover pads are a good alternative for regular throw-away cotton pads.

They are durable and can be used over and over again by simply washing them in the washing machine.

Wash the pads with your lighter colored clothing, towels, or bedding. If you wash them with darker color fabrics, they might change colors.

FIRST USE

I recommend to wash the pads the first time before using. Please refer to the "washing instructions" page for detailed washing instructions.

USE THE VELVET PADS FOR REMOVING DAILY MAKEUP

The pads with the velvet fabric recognizable by the border colored in light cream, are specially made to be used daily.

You can use the pads either dry or damp. If you use them damp, they will glide easier over your skin, and will also prevent them from absorbing too much product.

Make the pads damp by soaking them in water and squeezing them out. After that you add your makeup remover, natural oils - for example on almond or jojoba based-, on the pads and continue removing your makeup.

Wash your face with water to remove any leftovers. You can then follow your normal routine.

You can also use the velvet pads to apply toners, crèmes, or even makeup powder (or let your natural beauty shine).

USE THE TERRY PADS FOR CLEANING YOUR FACE

The Terry pads with the edges colored in dark brown, are specially made for thorough cleaning of your face or for light facial peeling.

Soak the pads in warm water, squeeze lightly, and clean your face with circular movements. You can also use normal facial cleanser or exfoliator on the pads for better cleaning.

Exfoliate your face no more than 2-3 times a week to prevent skin irritation.

Always use a moisturizer for your skin after you are done.

WASHING INSTRUCTIONS

Washing Machine

The included cotton laundry bag can be used to wash the used pads in the washing machine. I usually wash them with 7-9 pads at the same time. If you wash more at once, it might not always come out clean. Prevent the bag from opening by closing the washing bag 1 or 2 times.

The pads are washable at 40 - 60 ° C. I recommend to dry the pads by hanging them instead of ironing.

Hand Wash

You can wash the Terry pads with normal soap and water after cleaning your face. You can use them a number of times before you have to wash them in the washing machine.

Only do this if you have not used them to remove makeup. Place them in a clean place after use.

MAKE-UP STAINS

When using heavy foundation or waterproof mascara, it is possible that stains will remain on the pads. Don't panic, soak them in white vinegar and lemon for an hour. Longer is better.

Then you wash them in the washing machine.

If the pads still contain stains, don't worry, they will retain their effect and can still be used!

OTHER USES CASES

You can also use the pads in other ways. For example, to clean a baby's face or to clean your smartphone.

Bamboo is soft, suitable for sensitive skin, and anti-bacterial.

You will automatically find ways to reuse.

Let me know if you have any further questions or comments.

Spread the word, for a better planet!
